Markdown to PDF Converter

This project is a simple **Markdown to PDF Converter** built using **FastAPI** for the backend and a drag-and-drop interface for the frontend. It allows users to upload or paste Markdown content, preview it, and download a clean, styled PDF file.

Features

- Drag-and-drop Markdown upload
- Live Markdown-to-HTML rendering
- One-click PDF export
- Supports basic markdown elements:
    - Headings, Lists, Links, Tables, Code blocks, Images, etc.
- Powered by **WeasyPrint** and **Markdown** libraries

Tech Stack

- **Backend**: FastAPI, WeasyPrint, Markdown
- **Frontend**: HTML/CSS + JS (vanilla)
- **Containerized**: Docker + Docker Compose

Installation (Local Dev)

1. Clone the repo:

```bash git clone https://github.com/your-username/markdown2pdf.git cd markdown2pdf
```
